Hello Kathy,

Welcome to the first of a series of quarterly newsletters to show you what's happening in the Washington Architectural Foundation. This issue focuses on the Architecture in the Schools (AIS) program. AIS volunteers taught more than 550 children in 24 classrooms in metropolitan Washington DC schools this semester!

The work of the Washington Architectural Foundation would not be possible without the generous contributions of people like you. Your support is vital to the Foundation fulfilling its mission of "Architects Serving the Community." If you'd like to see more programs like Architecture in the Schools, we need your continued commitment. Please consider [making a donation online today](#).

Thank you!

*Beth Judy*, Program Manager

## Architecture in the Schools

Volunteers from EE&K and Gensler taught first graders about recycling, water conservation and geothermal energy during the spring session of AIS. EE&K designed the modernization of the LEED Gold Stoddert Elementary School which is now under construction. For the final project, students constructed a green house out of recyclable bottles for seedlings that will be transplanted to their new school garden next year.

*Kathy Dixon, AIA, with a student from Suitland High School*

Arel Architects focused on sustainable design technologies for the High School drafting class at Suitland High School in Prince Georges County. They presented several green building techniques including solar power, wind power, geothermal, earthberm. The final building project is a Vocational School building on the same site as their High School. The students developed their ideas through sketches, clay models, foam core models and CADD.

sketches, clay models, foam core models and CADD.

### Community Design Services (CDS)

AIA members Dan Curry, Catherine Moore, and Timothy So are developing conceptual plans for a new vocational training center for Universal

Center for Development in Temple Hills Maryland. UCD is an educational nonprofit that serves young adults with disabilities and young adults reentering society from incarceration.

**Canstruction 2010** Washington Architectural Foundation sponsors Canstruction, the creative design-build competition that benefits the Capital Area Food Bank. Canstruction DC has donated more than 250 tons of food since 1998. For the first time ever, Canstruction will have a theme. "International Architecture" coincides with the theme for AIA/DC's Architecture Week. **Check the Foundation website April 30th for the Canstruction Call for Entries.**
